Retirement plan, prepared for Dana Whitfield

Prepared September 28, 2026 · Fictional client for demonstration only

Recommendation

Invest $1,200,000 of $1,500,000 investable assets in a 60/40 portfolio. Keep a $180,000 liquid reserve, equal to 24 months of expenses at $7,500 a month.

Enter the market in 6 equal monthly tranches of $200,000 to reduce timing risk.

Projection

Projected income at 70: $9,000 a month under a 5% average return assumption.

Cash-reserve analysis

Item	Amount
Monthly expenses	$7,500
Reserve target (24 months)	$180,000
Cash on hand today	$300,000
Above target, can be invested or held	$120,000

Not covered by this plan

Individual stock picks, tax filing, cryptocurrency.

Projections are not guarantees. Past performance does not predict future results.
